DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.1429; no QA gate 3 sign-off)

Great Eastern Holdings Limited: what public evidence says about AI, 2026-10-25

Outside-in AI pre-read

Great Eastern Holdings Limited · pre-read for a first management conversation · 2026-10-25

Deliverable PLUMB-PR-great-eastern-research-e0bc54685dce · version 0.1 · run research-e0bc54685dce

AI-assisted draft — not yet approved by a named professional

DRAFT — not for board use: 29 claims released, 7 withheld and listed

Released: 29 claims. Withheld: 7 claims (listed).

The verification statement is not rendered. It renders only when citation resolution = 1.0, every attachment is reconciled MATCH, the build profile is client and an independent QA gate 3 sign-off approves the run (ghost deck R8/R9).

Reasons: internal profile; 1 attachment unreconciled; resolution 0.1429; no QA gate 3 sign-off.

Build report field	Value
Build profile	internal
Citation resolution rate	0.1429
Attachments reconciled MATCH	0 of 1
Run outcome	Released: 29 claims. Withheld: 7 claims (listed).
QA gate 3 sign-off	absent
Run ID	research-e0bc54685dce

AI-assisted draft. Prepared with the assistance of AI tools and not yet approved by a named member of PLUMB. Tools and models: run log models: plumbresearch-rules 0.1.0 (asia-southeast1), plumbverify-rules 0.5.0 (asia-southeast1).

Limitations. AI tools may produce plausible but incorrect content; withheld claims are listed in the gap register, not footnoted.

Great Eastern's FY2025 report shows AI in use and its AI leadership seat in transition

Situation — the FY2025 annual report, verbatim

“In 2025, we deployed an AI-enabled advisory platform that aims to reduce preparation time for financial advisors by approximately 75%, enabling them to focus more on customer engagement and advice.” (p. 14)

“We rolled out a proprietary AI-powered platform to automate medical claims, enhancing claim efficiency while improving customer experience.” (p. 14)

Complication — leadership and the regulatory clock

“Ms Zhao Jingyuan (Managing Director, Group Data and Artificial Intelligence) is expected to join Oversea-Chinese Banking Corporation Limited (“OCBC”) as the Head of the Group Data Office in March 2026.” (p. 67)

“The successors to Ms Zhao Jingyuan and Mr Jimmy Tong will be named in due course.” (p. 67)

Placeholder for a withheld claim: Withheld — see gap register G-6.

Question

Where is the framework behind Great Eastern's AI governance statements documented, and who owns it?

Answer

Offer — not a finding: the questions on S08 are what a Phase A assessment tests against evidence (S09).

Every sentence above is a verbatim quotation of a released claim, a question generated from released claims, a placeholder for a withheld claim, or labelled offer text.

Source: T2 Great Eastern Holdings Limited annual report FY2025 pp. 14, 40, 67 (attached; publisher hash unreconciled), 2026-10-25; confidence: filed

Great Eastern's FY2025 report names AI in six use cases, one still in testing

#	What the FY2025 annual report says (verbatim)	Use case	Stage (verb in quote)	Page
1	“In 2025, we deployed an AI-enabled advisory platform that aims to reduce preparation time for financial advisors by approximately 75%, enabling them to focus more on customer engagement and advice.”	adviser support	in use	p. 14 (also p. 40)
2	“We rolled out a proprietary AI-powered platform to automate medical claims, enhancing claim efficiency while improving customer experience.”	medical claims	in use	p. 14
3	“We are also testing an AI solution for complex underwriting cases to further improve automation and associated efficiency.”	underwriting	testing	p. 14
4	“In 2025, our AI-driven claims system delivered same-day turnarounds for 75% of medical claims, one of the fastest among Singapore’s health insurers based on Ministry of Health service indicators.”	medical claims	in use	p. 40
5	“We further leveraged AI in our customer segmentation process for our supplementary long-term care insurance plan, Great CareShield, to enable instant approvals for existing lower-risk customers.”	customer segmentation	in use	p. 40
6	“As AI accelerates transformation across the insurance industry, we have developed an Optical Character Recognition solution that extracts and analyses data from medical bills to identify potential wastage and abuse within medical claims.” … “This capability has significantly strengthened our claims oversight and operational efficiency.” … “The initiative was awarded the Best Claims Initiative in Malaysia at the Insurance Asia Awards 2025.”	medical-claims fraud, waste and abuse	developed	p. 43
7	“We have also developed an AI-driven model to help identify potential misconduct cases, significantly reducing the manual effort and time required for investigations.”	misconduct detection	developed; outcome stated	p. 43

So what: stage is the verb in each quote, the company's own description; production evidence and measurement are asked on S08.

Source: T2 Great Eastern Holdings Limited annual report FY2025 pp. 14, 40, 43 (attached; publisher hash unreconciled), 2026-10-25; confidence: filed

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.1429; no QA gate 3 sign-off)

Great Eastern's Group Data and AI seat is in transition, successor to be named

#	What the FY2025 annual report says (verbatim)	Status (from the sentence)	Page
1	“Ms Zhao Jingyuan (Managing Director, Group Data and Artificial Intelligence) is expected to join Oversea-Chinese Banking Corporation Limited (“OCBC”) as the Head of the Group Data Office in March 2026.”	in transition	p. 67
2	“The successors to Ms Zhao Jingyuan and Mr Jimmy Tong will be named in due course.”	successor not yet named	p. 67
3	“Mr Colin Chan (Managing Director, Group Marketing), Mr Ryan Cheong (Managing Director, Group Customer and Digital), Mr Clement Lien (Managing Director, Group Premier Wealth) and Mr Patrick Peck (Managing Director, Regional Agency, Financial Advisors and Bancassurance) left the Group in 2025.”	departed	p. 67
4	“In 2025, we restructured our Data & AI operating model to accelerate transformation.”	—	p. 41
5	“A new Group Integrated Propositions and Platforms Division, which unified the Group Marketing, Group Customer and Digital and Group Premier Wealth functions under a single leadership structure, was established in September 2025 under Ms Kwek-Perroy Li Choo, who was appointed as Managing Director.”	—	p. 67

Status is read from the sentence: 'expected to join' = in transition; 'left the Group' = departed. The report's own date is its as-of date; later appointments are not covered.

So what: continuity of AI ownership is not established by the public record; S08 asks who holds the seat now.

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.1429; no QA gate 3 sign-off)

Great Eastern's FY2025 annual report reaches level 4 of 5 on the AI-disclosure rubric

Component	Rule (exact)	Count	Note
specificity	AI sentence naming a concrete use case	10	
production	AI sentence with deployment language	3	
pilot_only	pilot / test language without a deployment verb	0	
quantified	AI sentence with a number tied to an outcome	3	
ownership	AI sentence naming board, C-level AI/data title or targets	2	
governance	AI sentence with responsible-AI / model-risk lexicon	see note	lexicon hits 0: not a score; asked as Q1 on the questions slide
mentions	AI-term mentions per 1,000 words	0.24	25 mentions

Level rule met: L4: production language with >=2 specific use cases and a quantified outcome or disclosed investment.

What the level can tell you (method note)

- How specifically the report describes AI use, on a published 1–5 ladder (Yu et al.)
- Which sentences triggered each component — each a released quotation in A1
- A like-for-like signal across named peers once their reports are run

What it cannot tell you (method note)

- Whether the systems work or at what scale: a report describes, it does not evidence
- Maturity: proxies corroborate only and never lift an item above level 3 (instrument §5.4)
- Governance maturity: a lexicon count in one document is a question, not a score
- Rank among peers: peer reports have not been run

So what: level 4 says the report is specific about AI; whether that AI is governed and measured is asked on S08.

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.1429; no QA gate 3 sign-off)

[H] The MAS AI risk clock is withheld until its primary source is fetched

Withheld — see gap register G-5, G-6, G-7

Every item bound to this slide is withheld, so the slide is a placeholder until the gap register items close (block-not-flag, pipeline C11).

Exhibit when built: MAS AIRM milestones (issued, takes effect, lifecycle controls) from the MAS primary PDF and landing page; compliance/regulatory-status-map.md MAS AIRM row

Six questions for management that the public record raises but cannot answer

#	Question for management	Why we ask
Q1 (observation)	Where is the framework behind Great Eastern's AI governance statements documented, and who owns it?	Observation, not a finding: 0 hits for 17 AI-specific governance terms in 1–244 pp.; Quoted: p. 14, p. 40; board AI references quoted: p. 73, p. 80
Q2	Which AI risk policies does Great Eastern set itself, and which does it adopt from OCBC group?	Quoted: p. 67; OCBC-level frameworks were not examined (observation limitation)
Q3	Has a successor for the Group Data and AI seat been named since the report, with the same scope?	Quoted: p. 67; seat in transition at the report date
Q4	What evidence would move the underwriting AI from testing to production, and who approves it?	Quoted: p. 14; described as testing in the report
Q5	How are the reported 75% figures measured: baseline, period and population; which are outcomes and which aims?	Quoted: p. 14, p. 40; figures as reported; method not disclosed in the report
Q6	What changed in the 2025 Data & AI operating-model restructure, and where does AI risk ownership sit?	Quoted: p. 41; restructure stated; design not described
Q7	Withheld — see gap register G-5, G-6	basis withheld — listed in the gap register

Observation, not a finding — search record: annual report FY2025, SHA-256 ae320cb3ffa2…, pp. 1–244, engine pdftotext-layout; 0 hits for 17 AI-specific governance terms; broader terms: “governance” 106 (2 with an AI term), “ethics / ethical” 7 (0 with an AI term), “technology risk” 3 (0 with an AI term), “oversight” 19 (0 with an AI term).

Limitations: (1) one document searched; (2) exact-term lexicon; (3) group-level (OCBC) frameworks not read; (4) PDF extraction not checked by eye; (5) no independent human read; two-upstream rule not met. Full search record and limitations: gap register §6.

So what: each answer moves an item from outside-in proxy to evidence; a Phase A assessment collects them (S09).

Source: T2 Great Eastern Holdings Limited annual report FY2025 pp. 14, 40, 41, 67, 73, 80 (attached; publisher hash unreconciled), 2026-10-25; confidence: filed

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.1429; no QA gate 3 sign-off)

A Phase A assessment would test these questions against evidence in 12 working days

Offer — not a finding. What a PLUMB assessment would establish, and in what order.

Phase A — public data, instrument, interviews (12 working days; no confidential data, no system access)

- Outside-in research sprint on public sources, executed with egress and every attachment reconciled before anything is shown
- 48-item self-assessment to 10–30 leaders: self-view and evidenced view side by side
- 6–10 executive interviews: the S08 questions answered with artefacts, not assertions
- Rank within named core peers (n disclosed); no percentile below n = 15
- Gated use-case list and MAS-mapped evidence-pack skeleton; independent reviewer at QA gate 3

Phase B — confidential extracts (+8 working days, only after onboarding clears)

- KPI extracts into the value driver tree; value pools re-sized on client data
- AI inventory, governance papers, vendor contracts and incident log reviewed
- Business cases on system-measured baselines; measurement design
- Full 10-artefact evidence pack; QA gate 3 re-run on every changed number

Fixed fee by client size band, Phase A sold alone; Phase B is a written option (pricing ladder §3.1).

Offer source: commercial/pricing-ladder.md v0.2 §3 (static offer text; not a claim about the prospect)

S10 · Released / withheld summary

29 claims were released and 7 withheld; every withheld claim is listed

Released: 29 claims. Withheld: 7 claims (listed).
