GREAT EASTERN HOLDINGS

Scaling AI at Great Eastern: from proven use cases to measurable value

Perspectives for discussion with the leadership team · October 2026

PLUMB ADVISORY

AI already works across Great Eastern; the next step is turning speed into dollars

5 of 5
lifecycle stages use AI

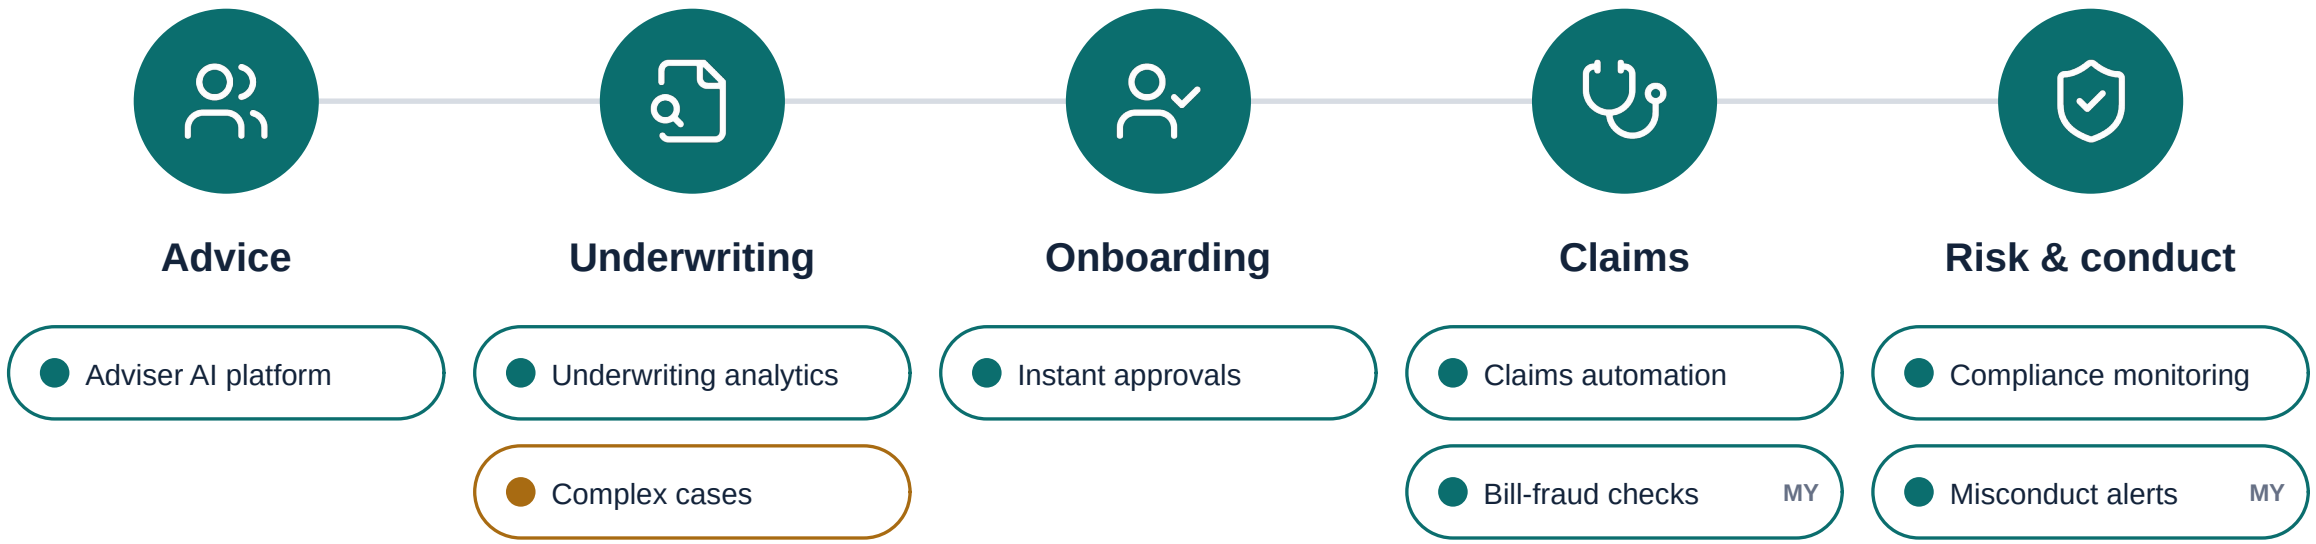

75%
of medical claims settled same day, 2025

S$4.0bn
claims and benefits paid, 2025

Board-level AI oversight exists; the AI framework is not yet described publicly.

Source: Great Eastern Holdings Annual Report 2025, pp. 6, 12, 38, 78, 145

AI is in use from advice to claims; complex underwriting is still in testing

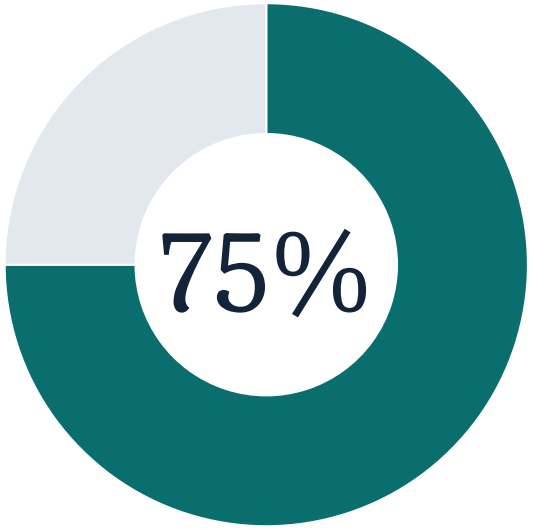

In use Testing MY = Malaysia operations

Source: Great Eastern Holdings Annual Report 2025, pp. 6, 12, 38, 41

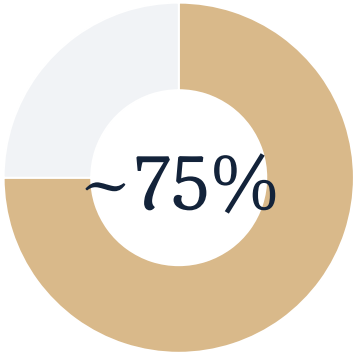

REPORTED OUTCOMES

Claims shows a proven AI result; the adviser platform's benefit is still a target

RESULT

medical claims settled same day, 2025

TARGET

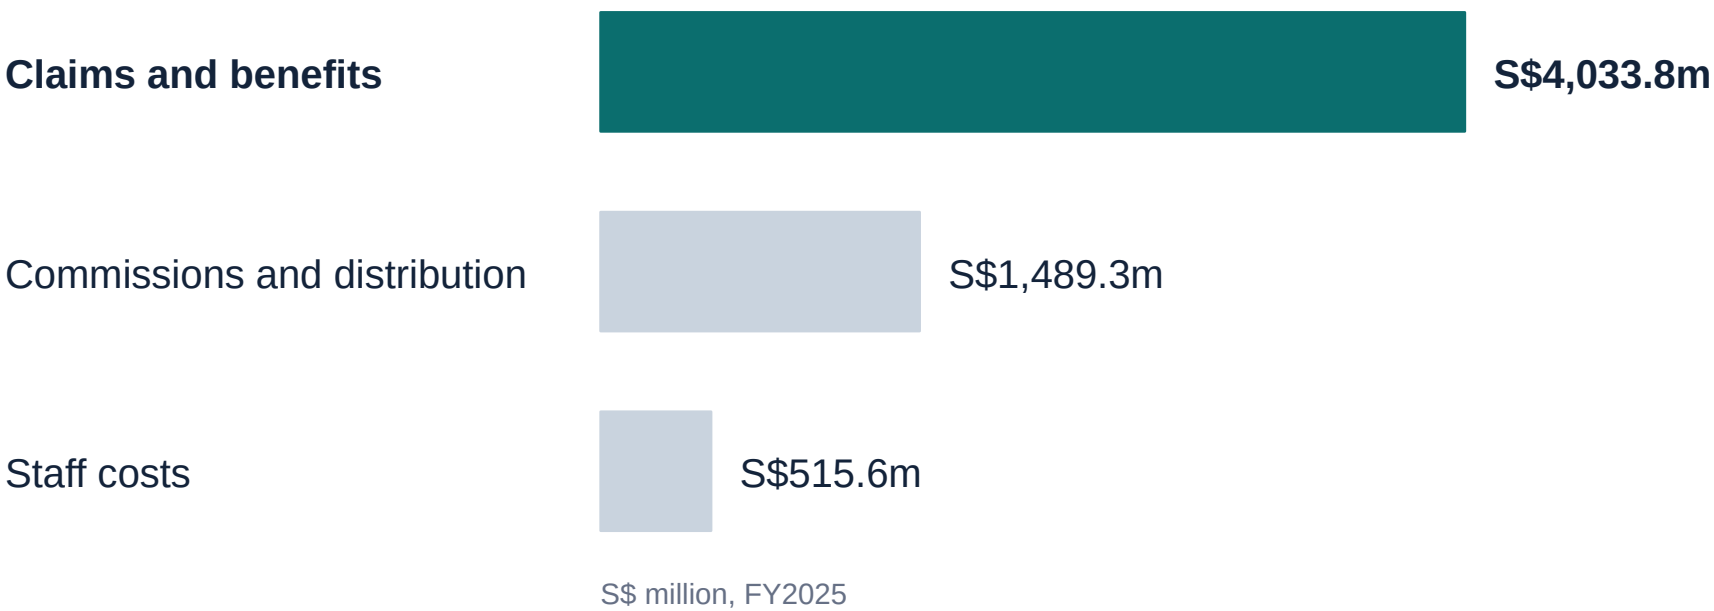

targeted cut in adviser preparation time

Neither figure is reported with a baseline or a dollar value.

Source: Great Eastern Holdings Annual Report 2025, pp. 12, 38

WHERE THE VALUE SITS

Claims and benefits is the largest cost line: every 1% is worth about S$40m a year

Every 1%

S$40m

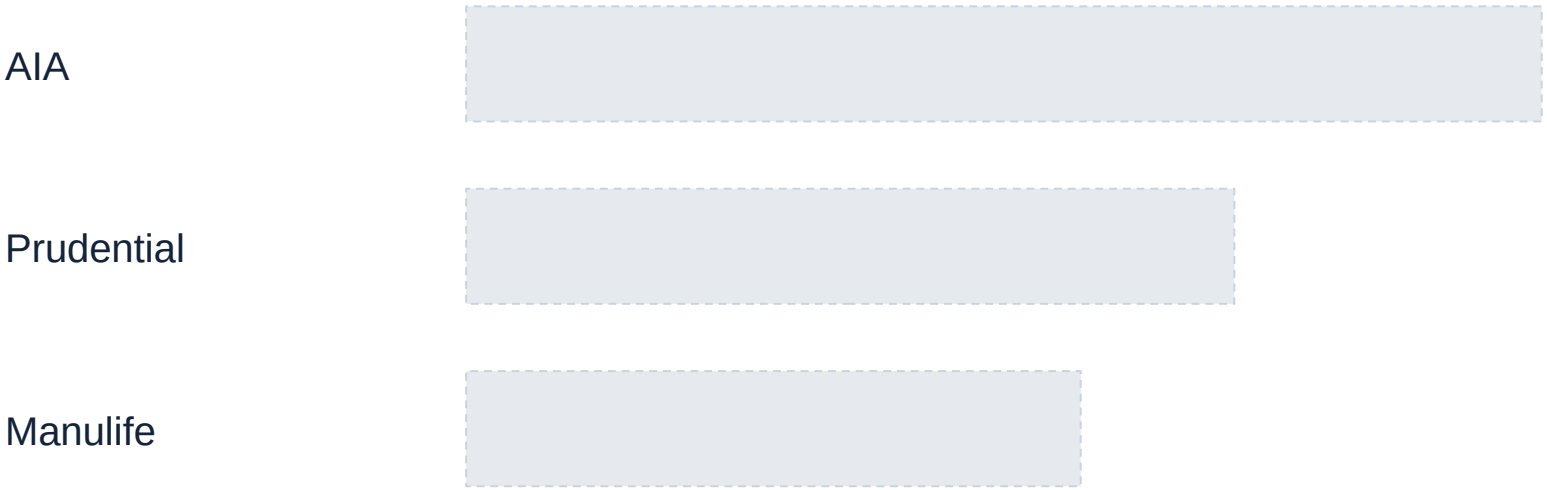

a year on claims and benefits

Illustrative arithmetic on reported figures, not a forecast. Sizing by use case is part of the assessment.

PEER COMPARISON

Peers now report AI value in dollars; Great Eastern reports speed

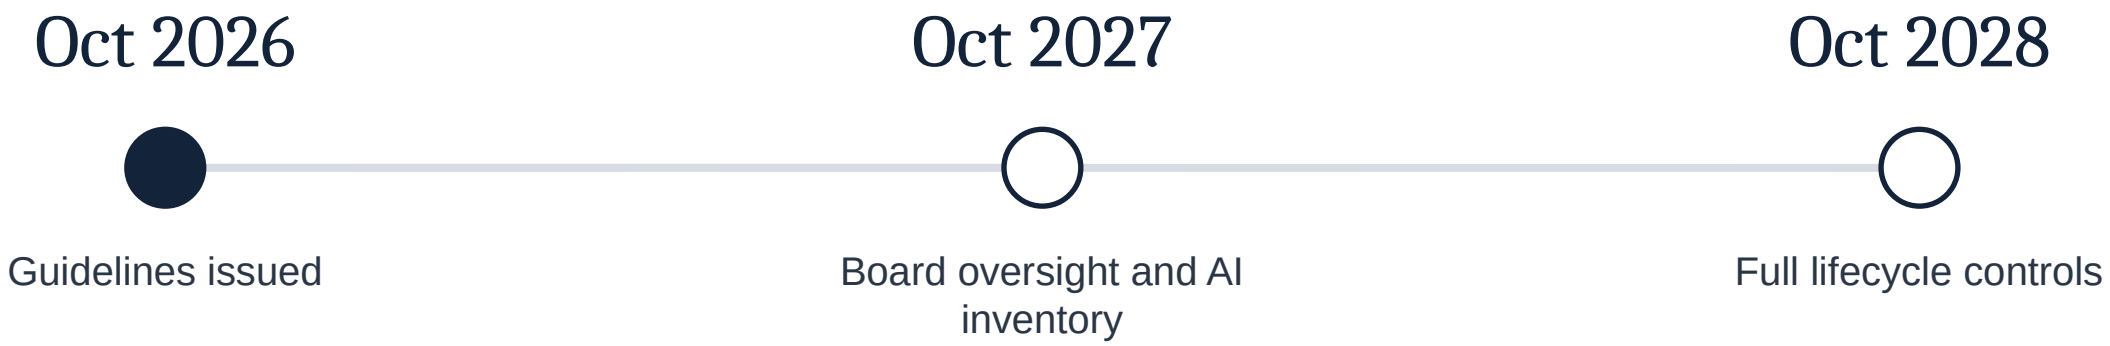

AWAITING SOURCE DOCUMENTS

Figures added once each peer's own report is checked.

REGULATORY CLOCK

MAS's AI risk rules give Great Eastern about a year to evidence AI governance

AWAITING SOURCE DOCUMENTS

Dates and expectations confirmed against MAS's published guidelines before use.

AI oversight reaches the board; the framework behind it is not yet public

	Disclosed in the 2025 report
Board-level AI oversight	●
AI used for compliance monitoring	●
AI policy or principles	○
AI inventory and risk tiers	○
Model risk management for AI	○

● Disclosed ○ Not described

Public disclosure only, not an assessment of practice; OCBC group frameworks not reviewed.

Three hypotheses would turn this outside-in view into decisions

Value

Which three AI use cases would cut claims and expense ratios most?

Governance

What would board-ready AI risk evidence look like?

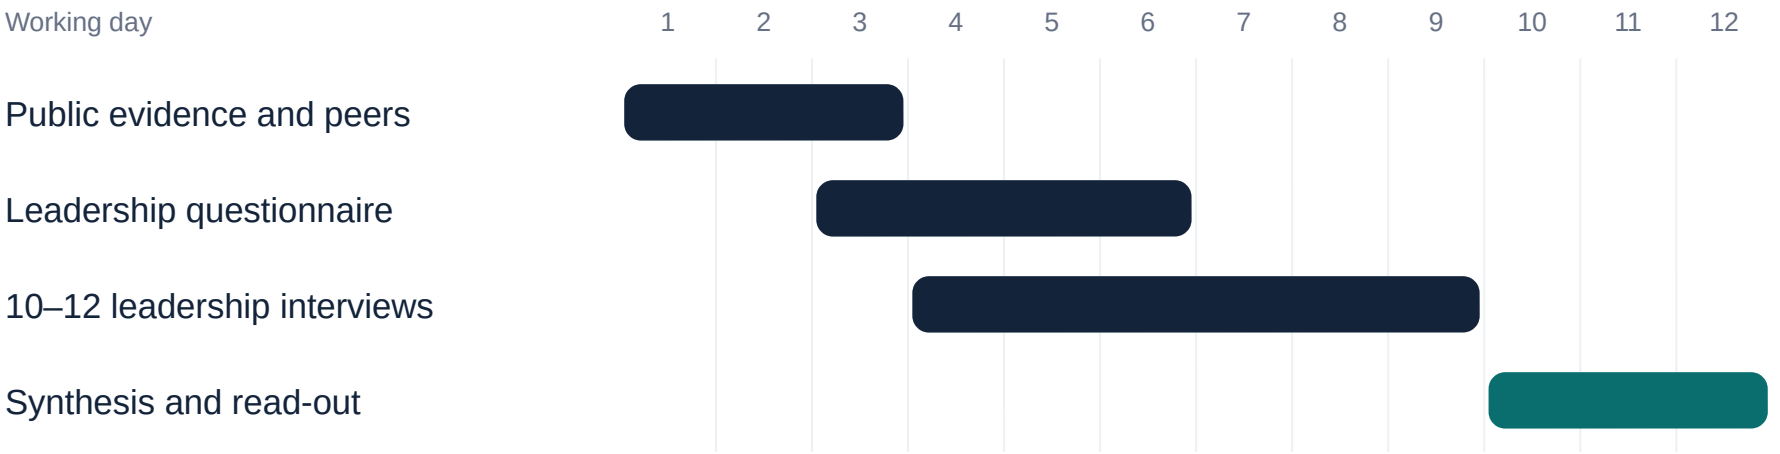

Scale

What would move complex underwriting AI into production?

PROPOSED NEXT STEP

A 12-day assessment would test these hypotheses with your leadership team

YOU RECEIVE

- Sized AI value pools
- AI inventory and risk tiers
- Production path for next use cases
