DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

Great Eastern Holdings Limited: Verified Enterprise AI Journey Assessment — board read-out, 2026-10-25

Verified Enterprise AI Journey Assessment

Great Eastern Holdings Limited · board read-out · 2026-10-25

Deliverable PLUMB-great-eastern-research-4f4e22fab7c2 · version 0.1 · run research-4f4e22fab7c2

AI-assisted draft — not yet approved by a named professional

DRAFT — not for board use: 11 claims released, 4 withheld and listed

Released: 11 claims. Withheld: 4 claims (listed).

The verification statement is not rendered. It renders only when citation resolution = 1.0, every attachment is reconciled MATCH, the build profile is client and an independent QA gate 3 sign-off approves the run (ghost deck R8/R9).

Reasons: internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off.

Build report field	Value
Build profile	internal
Citation resolution rate	0.2
Attachments reconciled MATCH	0 of 1
Run outcome	Released: 11 claims. Withheld: 4 claims (listed).
QA gate 3 sign-off	absent
Run ID	research-4f4e22fab7c2

AI-assisted draft. Prepared with the assistance of AI tools and not yet approved by a named member of PLUMB. Tools and models: run log models: plumbresearch-rules 0.1.0 (asia-southeast1), plumbverify-rules 0.4.0 (asia-southeast1).

Limitations. AI tools may produce plausible but incorrect content; withheld claims are listed in the gap register, not footnoted.

S03 · Executive summary (SCQA) · requires engagement data

[H] Great Eastern's [named strength] is [hollowing]; [n] AI domains [recover the margin]

Placeholder — requires engagement data

- every exec-summary number RELEASED with two upstreams (load-bearing, C3/C6)
- right-to-win and scorecard findings
- value pools and headline use cases

Exhibit when built: SCQA four-box — Situation, Complication, Question, Answer

S04 · Executive summary (answer detail) · requires engagement data

[H] [n] gated use cases, led by [use case], pay back within [n] months

Placeholder — requires engagement data

- right-to-win exhibit
- value-pool table
- use-case portfolio
- conservative business cases

S05 · Context and peer set · requires engagement data

[H] [Segment A] and [segment B] carry most of Great Eastern's profit

Placeholder — requires engagement data

- engagement charter scope
- client P&L by segment (QA2) or filed segment note (T1/T2)

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] Great Eastern's core peer set awaits verified sizes before the funnel can close

Withheld — see gap register G-1, G-2, G-3, G-4

Every item bound to this slide is withheld, so the slide is a placeholder until the gap register items close (block-not-flag, pipeline C11).

Exhibit when built: peer-set protocol funnel (seed, similarity, 0.3x–3x size band, regime, core/secondary, exited) with named peers

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] Great Eastern ranks [k] of [n] on economic profit

Placeholder — requires engagement data

- NOPLAT, invested capital and WACC per peer from filings
- derivation computed in code

S08 · Where you are · requires engagement data

[H] [org] scores [capability] of 100, [band], with [value_headline]

Placeholder — requires engagement data

- scorecard.json from plumbscore (10–30 maturity responses, evidence register)

Exhibit when built: two-axis scorecard — self-view and evidenced view side by side, value axis V1–V4

Great Eastern's FY2025 annual report reaches level 4 of 5 on the AI-disclosure rubric

Signal	Instrument items	Value	Status	Tier
Annual-report AI rubric level (annual_report FY2025)	D1.1, D5.4, D8.3	4 (level 1-5)	released	T2
AI mentions per 1,000 words (annual_report FY2025)	D1.1	0.24 per 1,000 words	computed	T2
Named competitors / peers in the report	peer-seed	0 names	computed	T2
AI / data leadership titles found (subject, present or in transition)	D1.2, D2.1, D5.2	3 titles	released	T2
Parent-group AI / data titles (context, not counted for D1.2)	D1.2 context — not scored	1 titles	released; context only	T2
Core peer count after funnel	§5.5	Withheld — see gap register G-1, G-2, G-3, G-4	blocked	—
AI-skill share of job postings (24 months)	D4.1	not evidenced (data gap)	not-available	—
AI-skill share: percentile vs core peers	D4.1	not evidenced (data gap)	not-available	—
Postings mentioning data_eng skills (24 months)	D2.2, D2.3	not evidenced (no tiered source)	computed	—
Postings mentioning mlops skills (24 months)	D3.2	not evidenced (no tiered source)	computed	—
Postings mentioning ai_product skills (24 months)	D4.5	not evidenced (no tiered source)	computed	—
Postings mentioning ai_governance skills (24 months)	D6.2	not evidenced (no tiered source)	computed	—
Postings mentioning llm skills (24 months)	D3.1	not evidenced (no tiered source)	computed	—
AI-related patents (5 filing years)	D4.2, D1.5	not evidenced (no tiered source)	computed	—

Proxies corroborate only and never lift an item above level 3 (instrument §5.4). Peer rows: peer n not released (peer-set signal withheld); no ranking or percentile is shown. Peer signal values require engagement data.

So what: outside-in disclosure corroborates the self-report but cannot lift any item above level 3 without engagement evidence (S08).

Great Eastern's FY2025 annual report reaches level 4 of 5 on the AI-disclosure rubric

Signal	Instrument items	Value	Status	Tier
AI patents: subject vs core-peer median	D4.2	not evidenced (data gap)	not-available	—

Source: T2 Great Eastern Holdings Limited annual report FY2025 pp. 8, 14, 18, 31, 40, 67, 229 (attached; publisher hash unreconciled), 2026-10-25; confidence: model-inferred

S10 · Where you are · requires engagement data

[H] [ExCo] rate [dimension] a full level [above] [operating managers]

Placeholder — requires engagement data

- raw self-report levels from 10–30 respondents (>=5 for sigma)
- respondent roles

S11 · Where you are · requires engagement data

[H] [Compliance sub-dimension] reaches level [n]; [named controls] do not yet exist

Placeholder — requires engagement data

- D6.1–D6.6 scores with artefact IDs
- inventory record
- kill-switch test record
- vendor-evidence review

S12 · Where you are · requires engagement data

[H] [Instrument] binds Great Eastern from [date]; [n] domains fall under its high-materiality track

Placeholder — requires engagement data

- jurisdiction list from charter
- domain list from S21
- regulatory-status map rows with VERIFY flags

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [n] capabilities pass all six right-to-win criteria

Placeholder — requires engagement data

- long list of 8–15 candidates with evidence packs
- C1–C6 scores and evidence classes

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [Capability statement] is a [strengthening / hollowing] advantage

Placeholder — requires engagement data

- evidence pack facts RELEASED
- interview quotes string-matched
- hollowing-check metrics vs peer set

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [Capability statement] is a [strengthening / hollowing] advantage

Placeholder — requires engagement data

- as S14

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [Capability statement] is a [strengthening / hollowing] advantage

Placeholder — requires engagement data

- as S14

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [Capability statement] is a [strengthening / hollowing] advantage

Placeholder — requires engagement data

- as S14

Optional slide: delete the ID if unused (IDs are stable; gaps are not renumbered).

S18 · Why you exist — reason 5 or temporary edge (optional) · requires engagement data

[H] [Candidate] is a benefit without a barrier, not a reason to exist

Placeholder — requires engagement data

- as S14

Optional slide: delete the ID if unused (IDs are stable; gaps are not renumbered).

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [n] of [n] strengths are hollowing, which makes them the largest value pools

Placeholder — requires engagement data

- H1–H5 results
- 3-year margin and pricing-power series vs peer median
- attacker map

[H] [Leaf KPI 1], [leaf KPI 2] and [leaf KPI 3] move most economic profit

Placeholder — requires engagement data

- client KPI extract (QA2) or outside-in proxies
- peer medians per leaf
- sensitivity computed in code

[H] Of [n] domains screened, [domains A–C] clear the value-feasibility bar

Placeholder — requires engagement data

- criterion scores with rationale
- sponsor per selected domain

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] The [n] pools are worth [S$X–Y] realised against a [S$Z+] ceiling

Placeholder — requires engagement data

- function cost base per domain
- ceiling and realised references with upstream pairs

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [n] use cases pass all five hard gates; [n] are Likely wins

Placeholder — requires engagement data

- scored use-case matrix
- intake scores C1–C5 and overrides
- signed gate checklists

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [Use cases A–C] lead domain 1 at tier [Tn–Tn]

Placeholder — requires engagement data

- per-use-case matrix rows
- owner and KPI
- baseline extract reference
- tier worksheet

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [Use cases A–C] lead domain 2 at tier [Tn–Tn]

Placeholder — requires engagement data

- as S24

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [Use cases A–C] lead domain 3 at tier [Tn–Tn]

Placeholder — requires engagement data

- as S24

[H] [Use cases A–C] lead domain 4 at tier [Tn–Tn]

Placeholder — requires engagement data

- as S24

Optional slide: delete the ID if unused (IDs are stable; gaps are not renumbered).

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [Use cases A–C] lead domain 5 at tier [Tn–Tn]

Placeholder — requires engagement data

- as S24

Optional slide: delete the ID if unused (IDs are stable; gaps are not renumbered).

[H] Conservative cases clear payback norms for [n] of [n] use cases

Placeholder — requires engagement data

- seven-section business case per use case
- system-measured baselines (G3)
- inference-price sensitivity

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] [n] use cases are GO, [n] CONDITIONAL on [named conditions]

Placeholder — requires engagement data

- signed gate checklists
- kill-switch test records
- vendor assessments
- ISO 42001 / NIST AI RMF mapping

[H] The first 90 days build [the inventory, baselines and first control group]

Placeholder — requires engagement data

- owner per lane
- dependencies from CONDITIONAL items in S30

S32 · Roadmap 6/12 months · requires engagement data

[H] By month 12, [use cases] are in production with finance-reconciled value

Placeholder — requires engagement data

- business-case timelines
- regulatory binding dates
- client capacity constraints

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)

[H] Every use case gets a system baseline, holdout group and stop condition before build

Placeholder — requires engagement data

- baseline extracts
- named statistical owner
- finance attribution rule (D8.4)

[H] [n] open items, led by [item], must close before the board decision

Placeholder — requires engagement data

- risk register entries (artefact 3)
- VERIFY register
- gap register disposition

DRAFT — not for board use (internal profile; 1 attachment unreconciled; resolution 0.2; no QA gate 3 sign-off)
